Report on the working of anti mosquito and anti-filarial Scheme undertaken by the Mangalore Municipal Council.

****

The above scheme consists of the following staff:-

Sanitary Inspectors	2
Laboratory Assistant	1
Field Assistants	4
Anti-mosquito mazdoors	36

For the working of the scheme the town has been divided into two circles and each circle is in charge of one Sanitary Inspector. Under each Sanitary Inspector two Field Assistants and eighteen anti-mosquito mazdoors are working. Scheme consists of mainly anti-larval measures. Cesspools, domestic breeding places, private drains, A.R.P. tanks, disused wells etc. are regularly sprayed once a week with Gammexane P.520 suspension. The drain mazdoors are working under Sanitary Inspectors in charge of anti-mosquitoex measures. Important public drains of the town are regularly canalised and cleaned and treated with waste oil to prevent breeding of mosquitoes. Oil balls are also prepared out of waste oil, saw-dust etc. are hung at intervals of big public drains to prevent breeding of mosquitoes. There are 28 pressure sprayers for use in spraying stagnations. Action is being taken to purchase some new pressure sprayers as some of the existing ones have become unserviceable. Whenever pressure sprayers are out of order, mazdoors are provided with mops and buckets for the purposes of spraying stagnations.

A small-scale laboratory with one microscope and other laboratory equipments i.e. dissection set, microscopic slides, steins etc has been set up. The Laboratory Assistant attends to dissection of mosquitoes staining etc.

The Field Assistants supervise the work of anti-mosquito mazdoors and they also attend to larva and mosquito collections. Places located in different wards of the Municipality have been selected as mosquito catching centres, and collection of mosquitoes is made regularly from these centres in addition to general collections. Particulars of larva and mosquito collections made daily are recorded in respective Mosquito Collection and Larval Collection Registers. These registers are daily checked by the Sanitary Inspectors and the mosquito Collections are handed over to the Laboratory Assistant for dissection. The Laboratory Assistant dissects these mosquitoes and particulars recorded in the dissection Register. This is daily checked by the Health Officer.

Sanitary Inspectors supervise the work of the Field Assistants and anti-mosquito mazdoors in addition to daily inspection of cesspools domestic breeding places, drains etc. The owners of private compounds are also requested to prevent stagnations by constructing soak-pits and to drain off stagnations whereever possible and also to keep private drains clean by periodical removal of rubbish, silt etc. deposited in such drains. Night-blood smears are taken periodically by the Sanitary Inspectors from persons residing in the various wards of the Municipality. Particulars regarding this survey are regularly recorded in the Register meant for the purpose.

Insecticidal service such as adult spraying is also undertaken by the staff on payment of the cost of D.D.T. emulsion which is made available for sale by the Municipal Council. Arrangements for spraying without charges residential houses are also made provided the persons make their arrangements to make available the spraying mixture.

Progressive reports of work done on anti-mosquito

measures are sent monthly to the Regional Malariologist, Coimbatore.

Sd.- C.Suryanarayan Rao,
Sanitary Inspector.

PUBLIC HEALTH DEPARTMENT.

From

The Director of Public Health,
Madras.

To

77618 The Secretary to Government,
Health, Education and Local Administration Department,
Fort St.George, Madras.

R.No.72121-Mal-53 dated 23-12-1953.

Sir,

Sub:-GRANT - Mangalore Municipality Scheme of Anti-filariasis - measures - payment of - sanction - requested.

Ref:-Letter No.B.6.21959- dated 4-12-1953 from the ~~Executive~~ Commissioner, Mangalore Municipality.

*****

I forward herewith one copy of the reference cited together with the enclosures thereto, and request that Government may be pleased to sanction payment to the Municipal Council, Mangalore, of a sum of Rs.12,708-5-0 as grant equal to 1/3rd of the total expenditure, of Rs.38124-14-0 incurred for carrying out anti-filariasis measures in the Municipal area, during the period from 1952-53. Provision exists for payment of this amount in the current year's budget.

2. The amount of expenditure incurred has been duly verified and found to be correct and the anti-filariasis work carried out in the area during the said period, has been satisfactory.

Yours faithfully,

For Director of Public Health, Madras.

Copy to:

The Examiner of Local Fund Accounts, Madras, with two copies of the application with enclosures.
He is requested to verify the expenditure in audit and return one copy of the enclosure together with a verification certificate for further action, if any.

The Municipal Commissioner, Mangalore, through the Chairman, Municipal Council.
